

Cocktail Therapy

Sensory Stimulation & Medicinal Mixology

7pm Tuesday 8th May 2012

£25 per person

Cocktail Therapy is the collaborative brainchild of The Colour Inn & interdisciplinary designer Tristan Ostrowski.

The event aims to explore the relationship between liquor & medicine with a set of 9 cocktails designed to stimulate the senses.

Using psychoactive, botanical & homeopathic ingredients each of the drinks has it's own curative properties and takes influence from the ancient & modern rituals of medicine & therapy.

We promise it won't hurt.

Attendees are requested to send a postal address to
welcome@thecolourinn.com
to receive their physical ticket.

Ticket's purchasable from <http://therapycocktail.eventbrite.com>
